This week we will continue our series on the emerging role of the microbiome in neurologic disease with a visit from Dr. Tim Sampson, an accomplished post-doctoral fellow in the lab of Dr. Mazmanian at CalTech. Tim will profile advances in understanding how the microbiome modulates neurodegeneration, particularly in Parkinson’s disease. Please join us – The GRC.

Grand Rounds Presents:

A Role for Gut Microbes in Neurodegenerative Disease

Timothy Sampson, PhD
Post-Doctoral Scholar
Biology and Biological Engineering
California Institute of Technology

Wednesday, November 8, 2017
9:00am – 10:00am
NRB Auditorium

*CME CREDIT AVAILABLE
