DID YOU HAVE A Traumatic Brain Injury (TBI) over 1 year ago? & Do you still have difficulty moving your hands, arms, feet or legs due to the injury?

YOU MAY BE ELIGIBLE TO PARTICIPATE IN A UCLA RESEARCH STUDY

This 12 month UCLA research study is looking at the safety and effectiveness of modified stem cells in patients with chronic motor deficits from TBI. All patients will have surgery, but there is a 3 to 1 chance you will receive stem cells.

**INCLUSION CRITERIA**
- TBI one year or more ago
- 18-75 years old
- Focal injury identified on MRI or CT
- willing to have brain surgery
- willing to be followed for 12 months with MRI scans, neurology and physical therapy visits
- willing to discontinue herbal or non-traditional medications

**EXCLUSION CRITERIA**
- Seizures in the past 3 months
- History of major neurological disease
- Uncontrolled psychiatric illness
- Substance use disorder
- Craniectomy with missing bone flap
- Pregnant or planning to be pregnant in the next 12 months
