This is a Hackathon dedicated to solving problems of interest to the QCBio community using Python.

- Single day workshop, spent solving a couple of coding problems
- Problems will be designed based on a survey of common issues faced by students and researchers of the area
- Problems intended for both beginners and advanced users

December 8th (2017), 9AM - 5PM
Collaboratory Classroom (Boyer Hall 529)
Lunch served between 12:30 and 2PM
